SECONDARY EDUCATION CERTIFICATE

EXAMINATION

GEOGRAPHY

Paper 01 – General Proficiency

75 minutes

READ THE FOLLOWING INSTRUCTIONS CAREFULLY.

1. This test consists of 60 items. You will have 75 minutes to answer them.
2. In addition to this test booklet, you should have an answer sheet.
3. Each item in this test has four suggested answers lettered (A), (B), (C), (D). Read each item you are about to answer and decide which choice is best.
4. On your answer sheet, find the number which corresponds to your item and shade the space having the same letter as the answer you have chosen. Look at the sample item below.

Sample Item

Hurricanes in the Caribbean area are MOST likely to occur during

- (A) February – April
- (B) April – June
- (C) July – September
- (D) October – February

Sample Answer

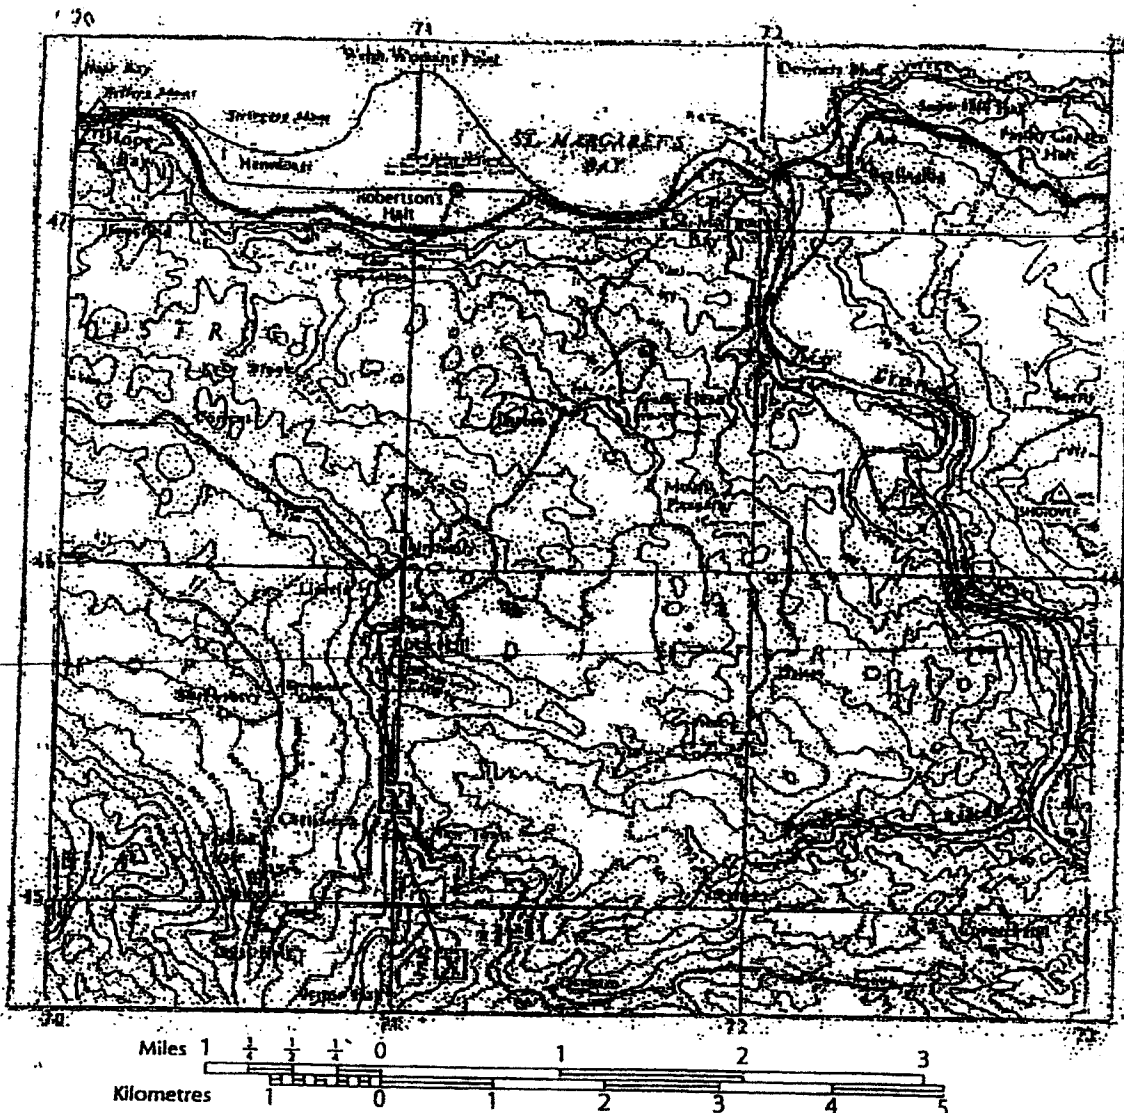

The best answer to this item is "July – September", so answer space (C) has been shaded.

5. If you want to change your answer, erase it completely and fill in your new choice.
6. When you are told to begin, turn the page and work as quickly and as carefully as you can. If you cannot answer an item, go on to the next one. You may return to this item later. Your score will be the total number of correct answers.
7. The use of silent, electronic non-programmable calculators is allowed.
8. The use of geometrical instruments is permitted.

DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO.

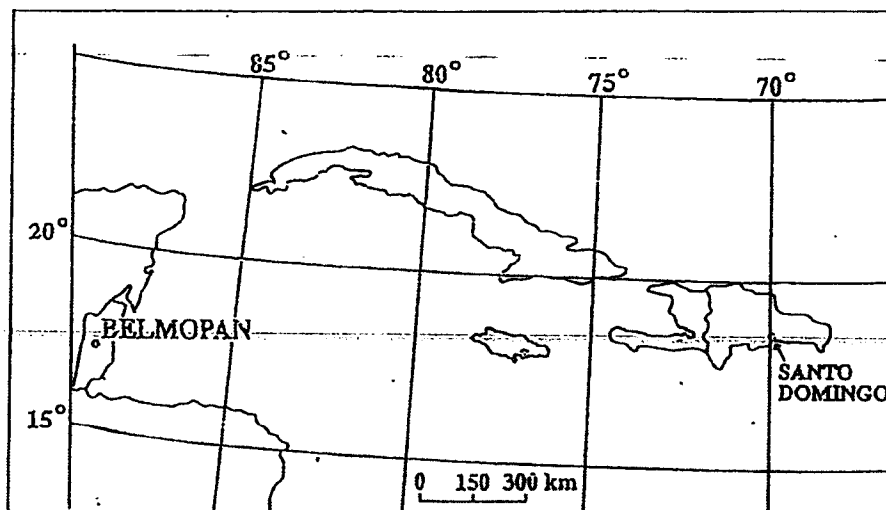

Items 1-5 refer to the following map extract at a scale of 1 : 50 000.

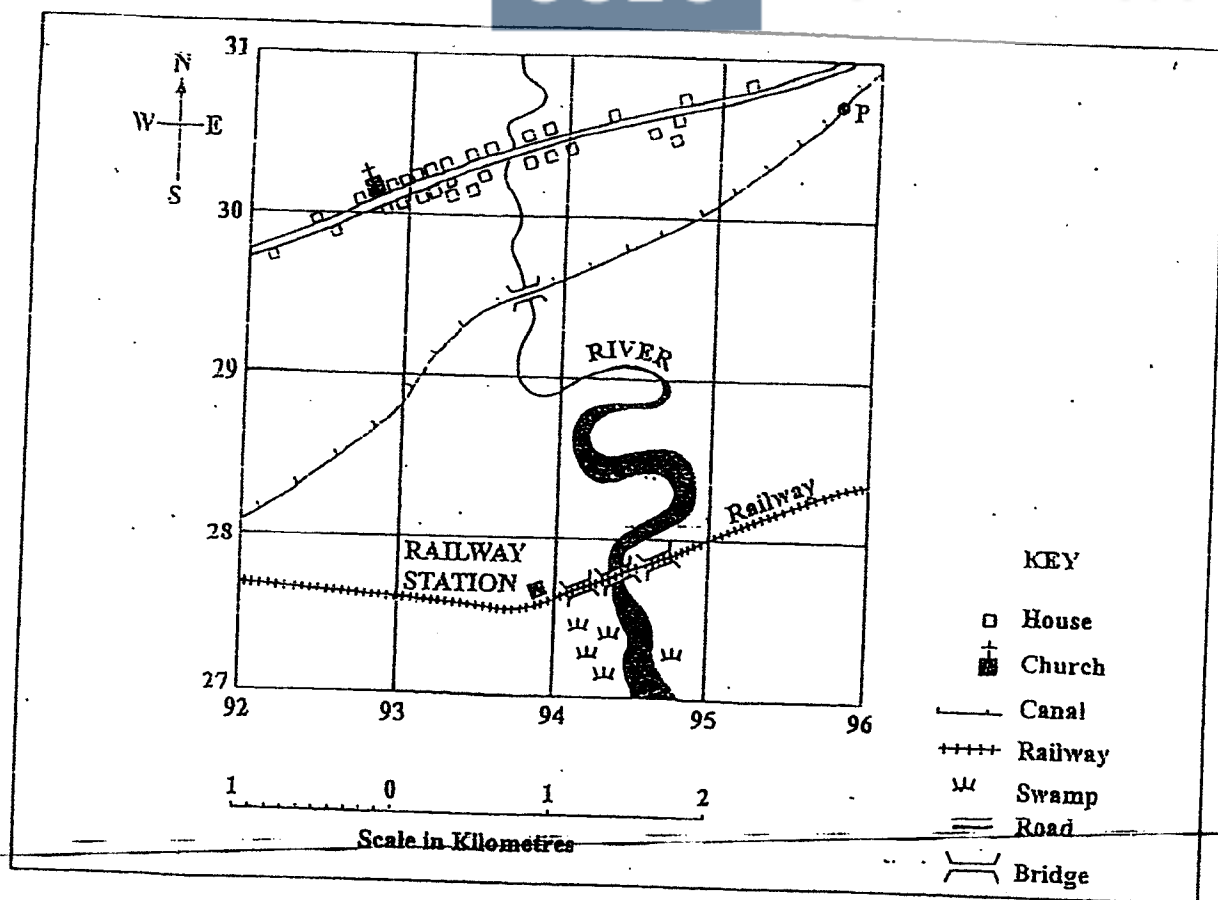

1. What is the direction of the trigonometrical station at Shotover (729 463) from Robertson's Halt (711 471)?
 - (A) Northeast
 - (B) Northwest
 - (C) Southeast
 - (D) Southwest
2. What is the contour interval, in feet, in grid square 7045?
 - (A) 50
 - (B) 100
 - (C) 150
 - (D) 250
3. The height, in feet, of the highest point in grid square 7045 is approximately
 - (A) 2250
 - (B) 2500
 - (C) 2750
 - (D) 3000

4. What is the grid bearing of Robertson's Halt (711 471) from the trigonometrical station at Shotover (729 463)?
- (A) 65°
(B) 115°
(C) 295°
(D) 355°
5. The landform located between X and Y on the southern section of the map extract on page 2 is
- (A) a spur
(B) a ridge
(C) a dry valley
(D) an escarpment
-
6. Which of the following is an example of an isopleth map?
- (A) Dot map
(B) Political map
(C) Contour map
(D) Vegetation map
7. When a traveller crosses the International Date Line while going westward, he will have to
- (A) add half a day to his calendar
(B) add one full day to his calendar
(C) continue with his calendar as normal
(D) subtract one full day from his calendar
-

Items 8–9 refer to the following sketch of part of the Caribbean.

8. Belmopan is located NEAREST to
- (A) 17° South, 88° West
(B) 17° North, 88° West
(C) 18° South, 88° West
(D) 18° North, 88° East
9. If the time in Belmopan is 3.00 p.m., what is the time in Santo Domingo?
- (A) 2.00 a.m.
(B) 2.00 p.m.
(C) 4.00 a.m.
(D) 4.00 p.m.

10. The church is situated in grid square

- (A) 3031
- (B) 3092
- (C) 9230
- (D) 9293

11. What is the form of the settlement in which the church is located?

- (A) Linear
- (B) Isolated
- (C) Dispersed
- (D) Nucleated

12. The feature passing through P is a

- (A) road
- (B) river
- (C) canal
- (D) railway

Items 13–15 are based on the following table showing annual rainfall and temperature figures for a certain location.

Months	J	F	M	A	M	J	J	A	S	O	N	D
Temp (°C)	26	26	26	27	28	27	25	25	25	26	26	27
Rainfall (mm)	155	160	225	275	210	125	100	150	180	260	250	210

13. The annual temperature range shown above is
- (A) 2 °C
(B) 3 °C
(C) 25 °C
(D) 27 °C
14. The rainfall pattern indicates
- (A) rain throughout the year
(B) rain only in the cooler season
(C) rain only in the warmer season
(D) little variation in the rainfall from one month to the next
15. The climatic type shown above is described as
- (A) Savanna
(B) Equatorial
(C) Tropical Marine
(D) Tropical Continental

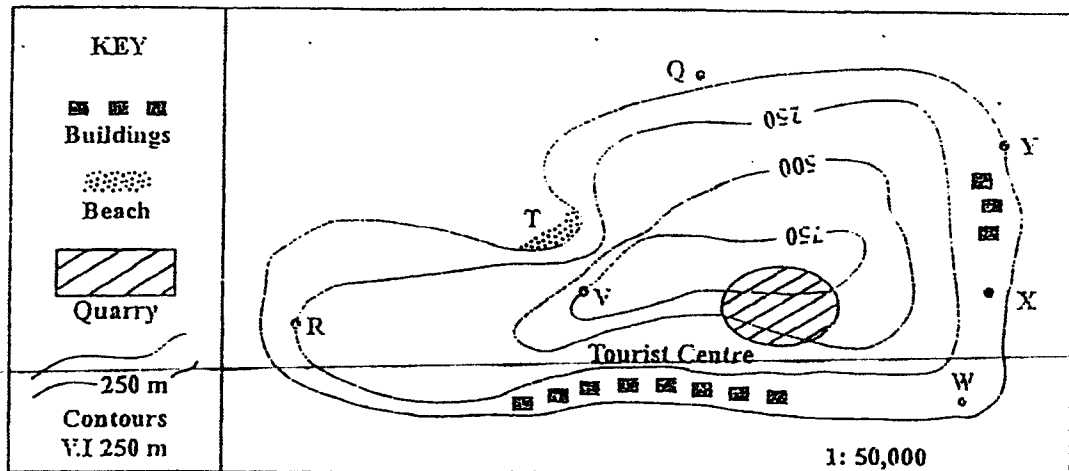

Items 16–17 refer to the following table which gives data for four Caribbean countries for the year 2000.

Country	Density	Area (in sq. miles)	Population
Jamaica	630	4 400	2 771 026
Barbados	-	166	278 580
Trinidad and Tobago	614	1 864	1 144 249
Guyana	9	83 000	722 000

16. Barbados has a population density (people per square mile) of approximately
- (A) 100
(B) 166
(C) 1 678
(D) 2 788
17. A comparison of the population densities of the countries in the table above shows that
- (A) Barbados has a higher density than Guyana
(B) Guyana has a higher density than Jamaica
(C) Barbados has a lower density than Jamaica
(D) Jamaica has the same density as Trinidad and Tobago

18. The single most important difference between weather and climate is the
- (A) statistical method used
 - (B) length of time considered
 - (C) size of the region studied
 - (D) type of atmospheric elements considered

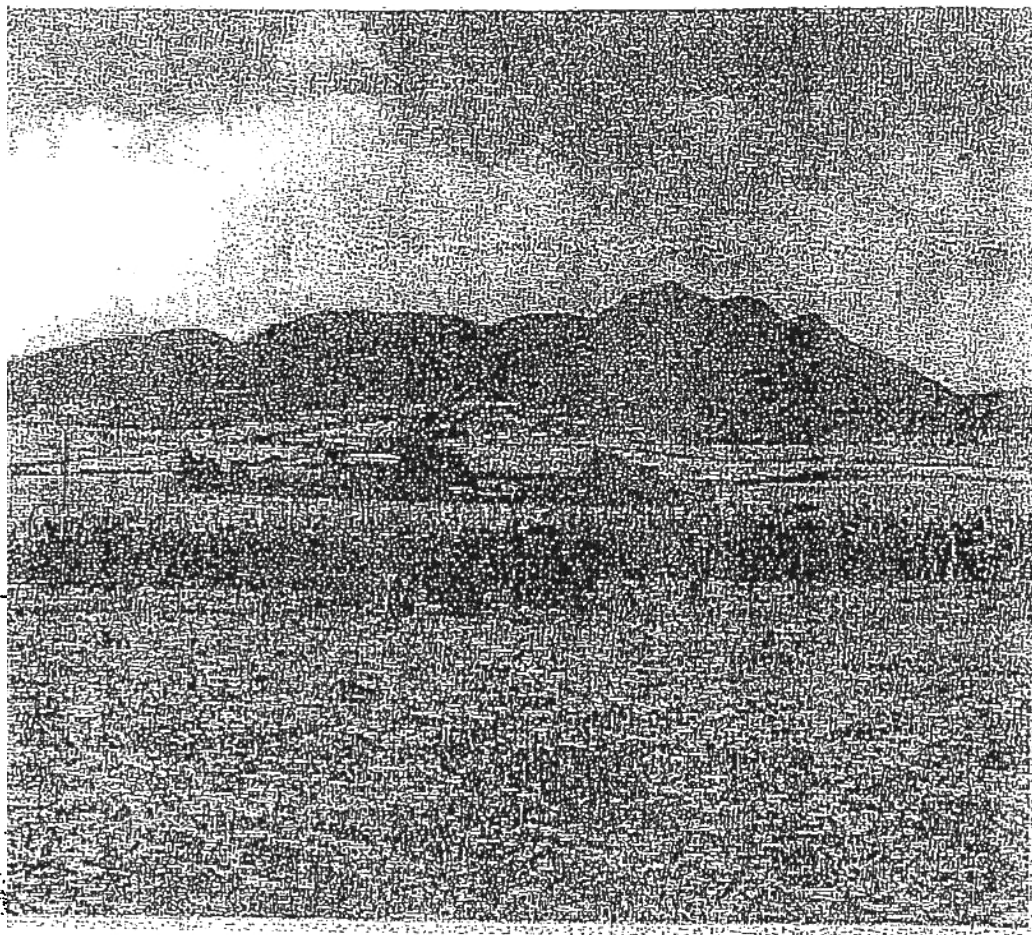

Item 19 refers to the following map.

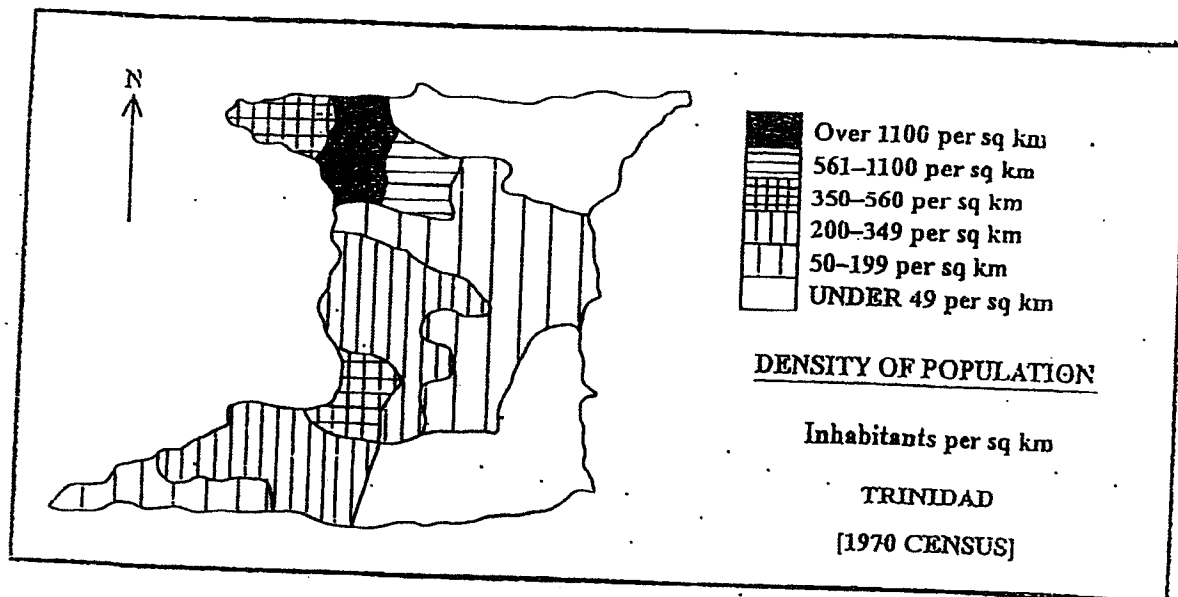

19. The features found at T on the map are
- (A) bay and beach
 - (B) headland and bay
 - (C) cliffs and coral reefs
 - (D) beach and headland
20. Which of the following factors would cause high population density in the Caribbean?
- I. Availability of jobs
 - II. Flat low-lying land
 - III. Congestion in the city centre
 - IV. The presence of a major port
- (A) I and II only
 - (B) II and III only
 - (C) I, II and IV only
 - (D) I, II, III and IV

- 7 -

Item 21 refers to the following photograph.

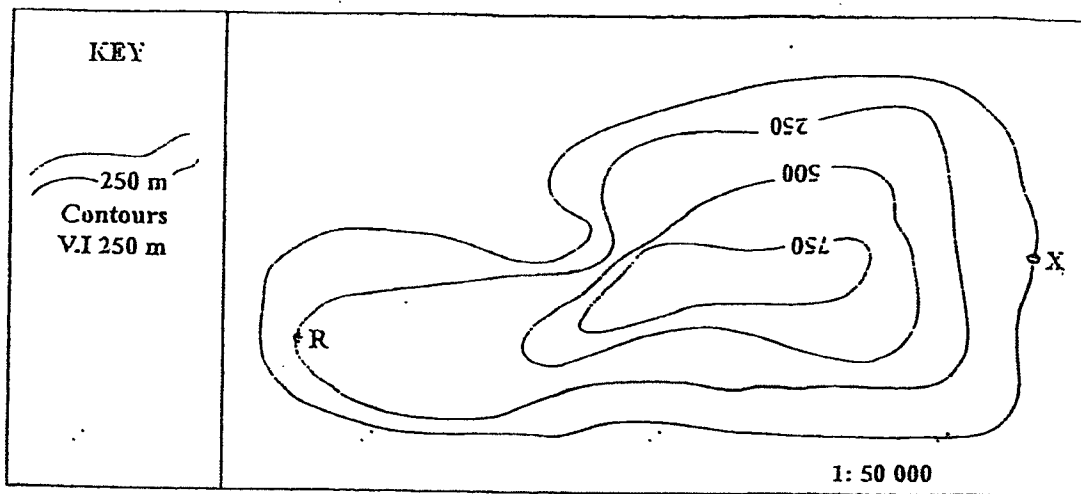

21. To what type of farming is the activity, shown in the photograph, MOST likely related?
- (A) Mixed cropping
 - (B) Peasant farming
 - (C) Commercial arable
 - (D) Commercial pastoral

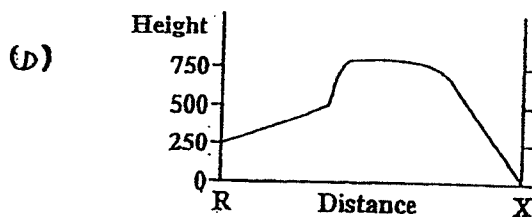

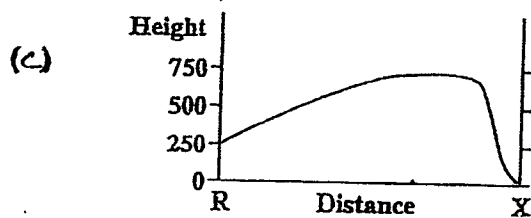

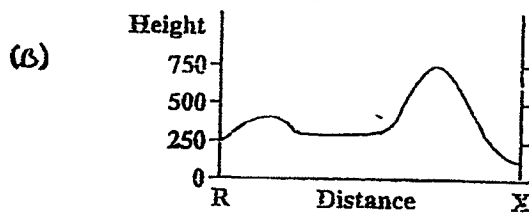

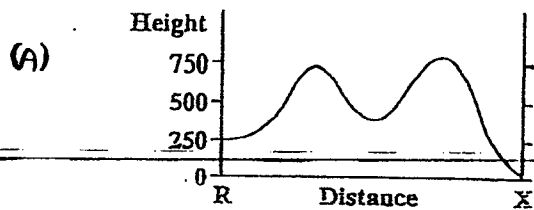

22. Which of the following statements is true according to the population density map of Trinidad above?
- (A) The west has the lowest population.
 - (B) The northwest is densely populated.
 - (C) The centre has the highest population.
 - (D) The southwest is sparsely populated.

Item 23 refers to the diagram below.

23. A contour sketch from Point R to Point X would look like

GO ON TO THE NEXT PAGE

24. A volcanic spine develops when

- (A) the lava is viscous
- (B) a caldera is present
- (C) the explosion is violent
- (D) ash and cinder are ejected

25. What word is used to describe that part of a river's course which is wide and shallow and has bars and islands around which the river flows?

- (A) Flooded
- (B) Braided
- (C) Turbulent
- (D) Meandering

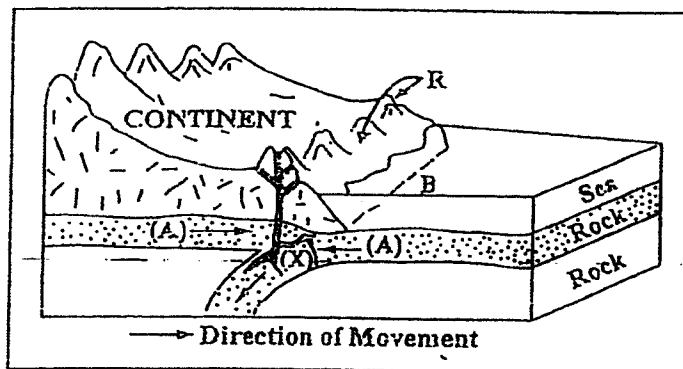

28. Which of the following statements is NOT true of ALL volcanoes?

- (A) Their eruptions are violent.
- (B) They occur in areas of crustal weakness.
- (C) Their cones are made of ejected material.
- (D) Various gases are emitted during eruption.

29. The 'process of exfoliation' may be defined as

- (A) peeling off of the outer layers of rocks
- (B) splitting of rocks into rectangular blocks
- (C) movement of rocks due to the action of rivers
- (D) disintegration of rocks by root penetration into crevices

Items 26-27 refer to the diagram below.

26. The features shown at R are

- (A) volcanoes
- (B) fold mountains
- (C) block mountains
- (D) volcanic island arcs

30. The slow downhill movement of debris and soil under the influence of gravity may BEST be described as

- (A) landslide
- (B) soil creep
- (C) soil erosion
- (D) mass wasting

27. Which of the following plate margins is shown?

- (A) Divergent
- (B) Transform
- (C) Convergent
- (D) Conservative

- 11 -

Items 31–32 refer to the data below regarding world production of aluminium (million tonnes) in selected countries for 2003.

Country	mil. tonnes	Country	mil. tonnes	Country	Tonnes (in millions)
Australia	1.8	France	0.5	Spain	0.4
Argentina	0.3	West Germany	0.8	Russia	3.5
Brazil	1.4	Italy	0.2	UK	0.4
Canada	2.8	Mozambique	0.4	USA	2.7
China	5.4	Norway	1.2	Venezuela	0.6
				World Total	27.7

31. Which country produced just over one-eighth of the aluminium in the world in 2003?

(A) USA
(B) Russia
(C) Canada
(D) Argentina

32. The number of tonnes of aluminium produced by Argentina was

(A) 3 000
(B) 30 000
(C) 300 000
(D) 3 000 000

33. Subduction occurs at

(A) mid-oceanic ridges
(B) divergent plate boundaries
(C) transform plate boundaries
(D) convergent plate boundaries

35. Deposition by a river usually occurs when its

(A) volume increases
(B) velocity increases
(C) gradient increases
(D) velocity decreases

34. Fold mountains form where plates of the earth's crust move

(A) around each other
(B) towards each other
(C) parallel to each other
(D) away from each other

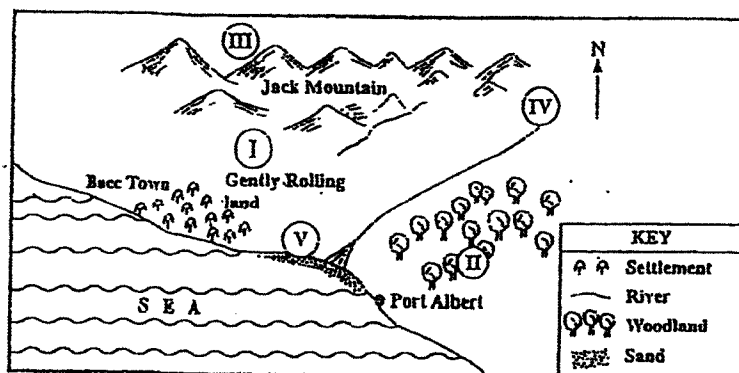

36. Which of the following BEST describes the vegetation found in Tropical Grasslands?

(A) Short grasses mixed with tall trees
(B) Tall grasses interspersed with trees
(C) Evergreen grasses mixed with short trees
(D) Pure stands of trees with an undergrowth of grass

37. Which of the following features is the result of intrusive volcanicity?

- (A) Sill
- (B) Crater
- (C) Caldera
- (D) Lava plateau

Items 38–39 are based on the following diagram.

38. Which of the areas, I, II, III or IV, would be a typical location for commercial arable farming in the Caribbean?

- (A) I
- (B) II
- (C) III
- (D) IV

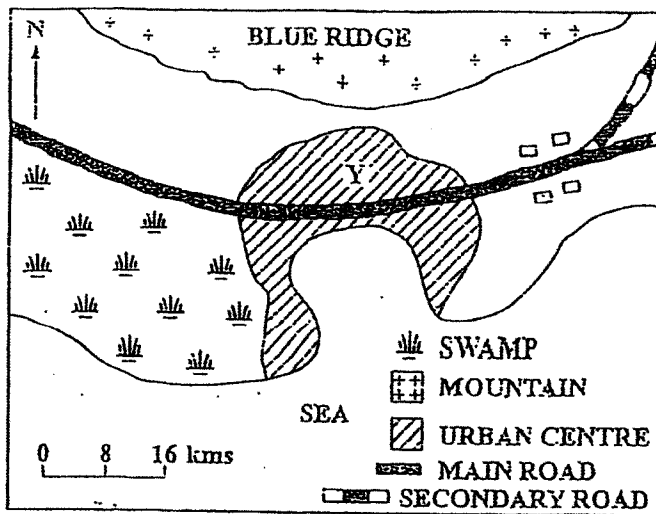

39. The MOST likely location for a hotel in the Caribbean is at

- (A) I
- (B) II
- (C) III
- (D) V

40. Rapid urbanization in Caribbean countries USUALLY results in

- (A) increased employment in the cities
- (B) decreased foreign exchange earnings
- (C) improvement in the standard of living
- (D) housing shortages in the cities

Items 41–42 refer to the following sketch map.

41. Which of the following BEST explain the location of the urban centre in the sketch map above?

- I. The presence of flat land
- II. The nearness to the mountains
- III. The presence of a natural harbour

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

42. In which direction is the town MOST likely to expand?

- (A) East
- (B) West
- (C) North
- (D) South

43. Which of the following has resulted from the establishment of secondary (manufacturing) industries in the Caribbean?

- (A) Reduced cost of living
- (B) Decreased external markets
- (C) Increased employment opportunities
- (D) Increased importation of consumer goods

44. Which of the following exerts the GREATEST influence on tourism in the Caribbean?

- (A) Climate
- (B) Carnival
- (C) Coral reefs
- (D) Tropical forests

45. In peasant farming in the Caribbean, the maintenance of the organic content in the soils can be ensured by the

- (A) rotation of crops
- (B) application of manures
- (C) burning of vegetation
- (D) use of chemical fertilizers

46. Which of the following is classified as a tertiary industry?

- (A) Tourism
- (B) Construction
- (C) Processing of food
- (D) Processing of aluminium

47. Which of the following features is MOST typical of commercial arable farming as practised in the Prairies of Canada?

- (A) Small acreage
- (B) Multi-crop system
- (C) Large labour force
- (D) Intensive mechanization

48. Which of the following is NOT a problem affecting industrial development in the Caribbean?

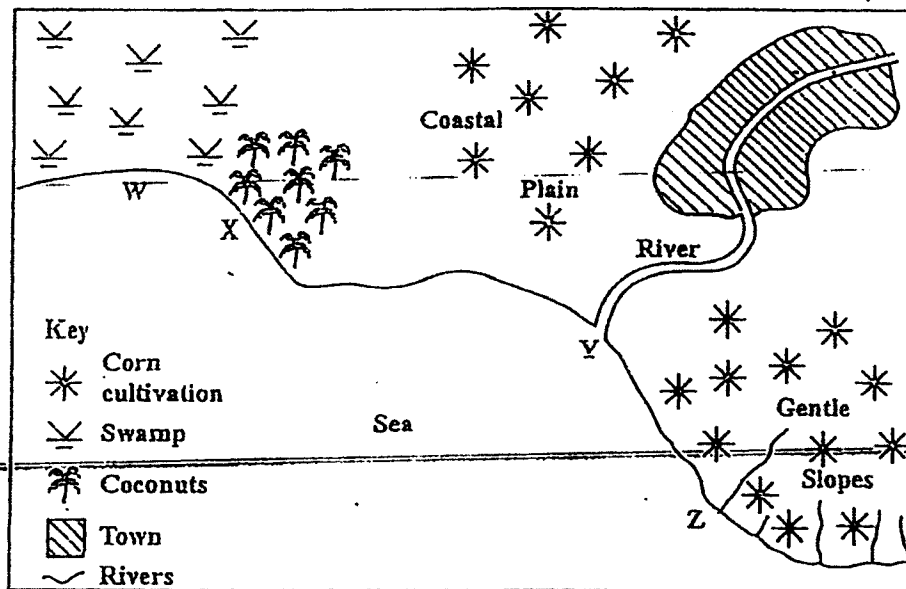

- (A) Limited capital
- (B) Limited markets
- (C) A large labour force
- (D) Limited raw materials

49. Which of the following statements are true of MOST capital cities in the Caribbean?

- I. They are usually ports and transportation centres.
- II. They serve as the administrative centres of the various countries.
- III. Their populations are falling due to migration.

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Items 50–51 are based on the sketch map below.

50. Water pollution is MOST likely worst at

- (A) W
- (B) X
- (C) Y
- (D) Z

51. Which of the following factors is MOST likely to lead to water pollution along the coast at Z?

- (A) The lack of tidal currents
- (B) The flatness of the land
- (C) The presence of the swamp
- (D) The growing of corn on the slopes

- 15 -

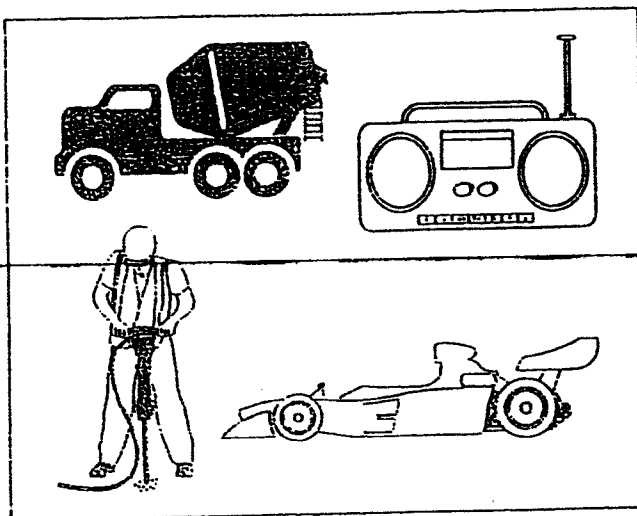

52. Which of the following is the MOST important consideration in the location of primary industries?

- (A) Power
- (B) Labour
- (C) Transportation
- (D) Raw materials

55. Which of the following contributes MOST to pollution of the environment of capital cities in CARICOM?

- (A) Discharge of chemicals in the sea
- (B) Discharge of fish waste in the sea
- (C) Exhaust fumes from motor vehicles
- (D) Accumulation of garbage from factories

Item 53 refers to the following diagram.

53. The type(s) of pollution common to the activities illustrated in the diagram above is/are

- I. noise pollution
- II. chemical pollution
- III. industrial pollution

- (A) I only
- (B) II only
- (C) III only
- (D) I, II and III

56. Which of the following poses the MOST serious threat to the rivers of the Caribbean?

- (A) Tourist activities
- (B) Deforestation and erosion
- (C) Improper fishing practices
- (D) Illegal dumping of waste

57. Which of the following can pollute the underground water supply?

- I. Mulch
- II. Pesticides
- III. Chemical fertilizers

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

58. Which of the following may cause damage to coral reefs in the Caribbean?

- (A) Oxygen
- (B) Sunlight
- (C) Shallow water
- (D) Muddy water

54. Which of the following practices may help to eliminate problems of pollution created by household waste?

- (A) Depositing in the sea
- (B) Dumping along water courses
- (C) Piling up in secluded spots
- (D) Burying and covering with soil

59. Which of the following may harm the marine environment of the Caribbean?

- I. Zoning of marine activities
- II. Harvesting of coral formations for souvenirs
- III. Discharging sewage and industrial waste along the shore

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

60. Which of the following sequences USUALLY occurs where soil erosion is a problem?

- (A) Increased run off → decreased infiltration → deforestation → soil erosion
- (B) Deforestation → decreased infiltration → increased run off → soil erosion
- (C) Deforestation → increased infiltration → increased run off → soil erosion
- (D) Increased run off → deforestation → decreased infiltration → soil erosion

END OF TEST

IF YOU FINISH BEFORE TIME IS CALLED, CHECK YOUR WORK ON THIS TEST.
