EXAMINATION**

GEOGRAPHY

Paper 01 – General Proficiency

1 hour 15 minutes

07 JUNE 2018 (a.m.)

READ THE FOLLOWING INSTRUCTIONS CAREFULLY.

1. This test consists of 60 items. You will have 1 hour and 15 minutes to answer them.
2. In addition to this test booklet, you should have an answer sheet.
3. Each item in this test has four suggested answers lettered (A), (B), (C), (D). Read each item you are about to answer and decide which choice is best.
4. On your answer sheet, find the number which corresponds to your item and shade the space having the same letter as the answer you have chosen. Look at the sample item below.

Sample Item

Hurricanes in the Caribbean area are MOST likely to occur during

- (A) February–April
- (B) April–June
- (C) July–September
- (D) October–February

Sample Answer

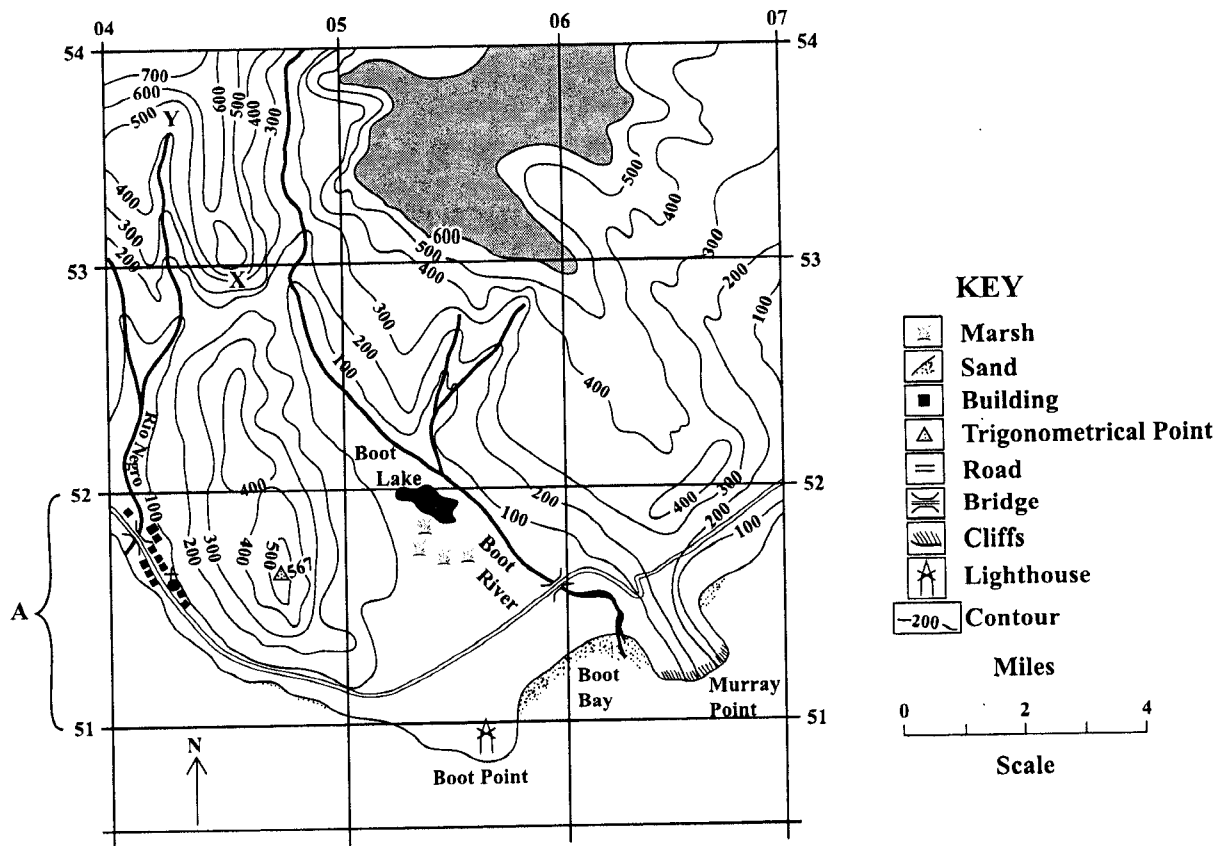

The correct answer to this item is “July–September”, so (C) has been shaded.

5. If you want to change your answer, erase it completely before you fill in your new choice.
6. When you are told to begin, turn the page and work as quickly and as carefully as you can. If you cannot answer an item, go on to the next one. You may return to that item later.
7. You may use a silent, non-programmable calculator to answer items.
8. The use of geometrical instruments is permitted.

DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO.

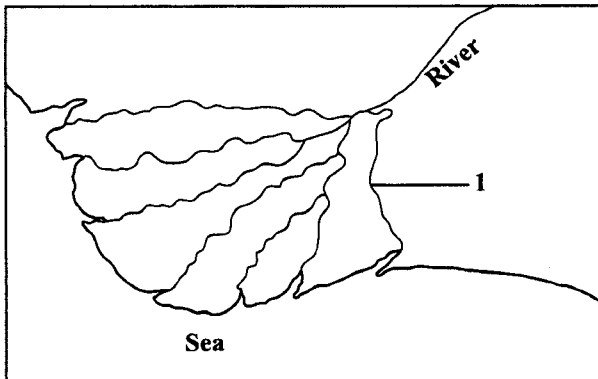

Items 1-3 refer to the following map.

1. What is the contour interval used on the map?
 - (A) 50 ft
 - (B) 100 ft
 - (C) 200 ft
 - (D) 300 ft
2. In which of the following directions does Boot River flow?
 - (A) Northwest
 - (B) Northeast
 - (C) Southwest
 - (D) Southeast
3. What settlement pattern is shown in the grid square labelled A?
 - (A) Linear
 - (B) Nuclear
 - (C) Isolated
 - (D) Dispersed

GO ON TO THE NEXT PAGE

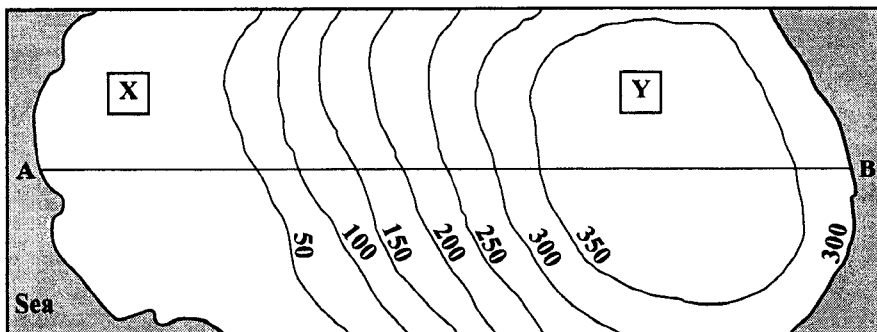

Item 4 refers to the following diagram.

4. In the diagram above, the feature labelled 1 is a

- (A) mouth
- (B) tributary
- (C) confluence
- (D) distributary

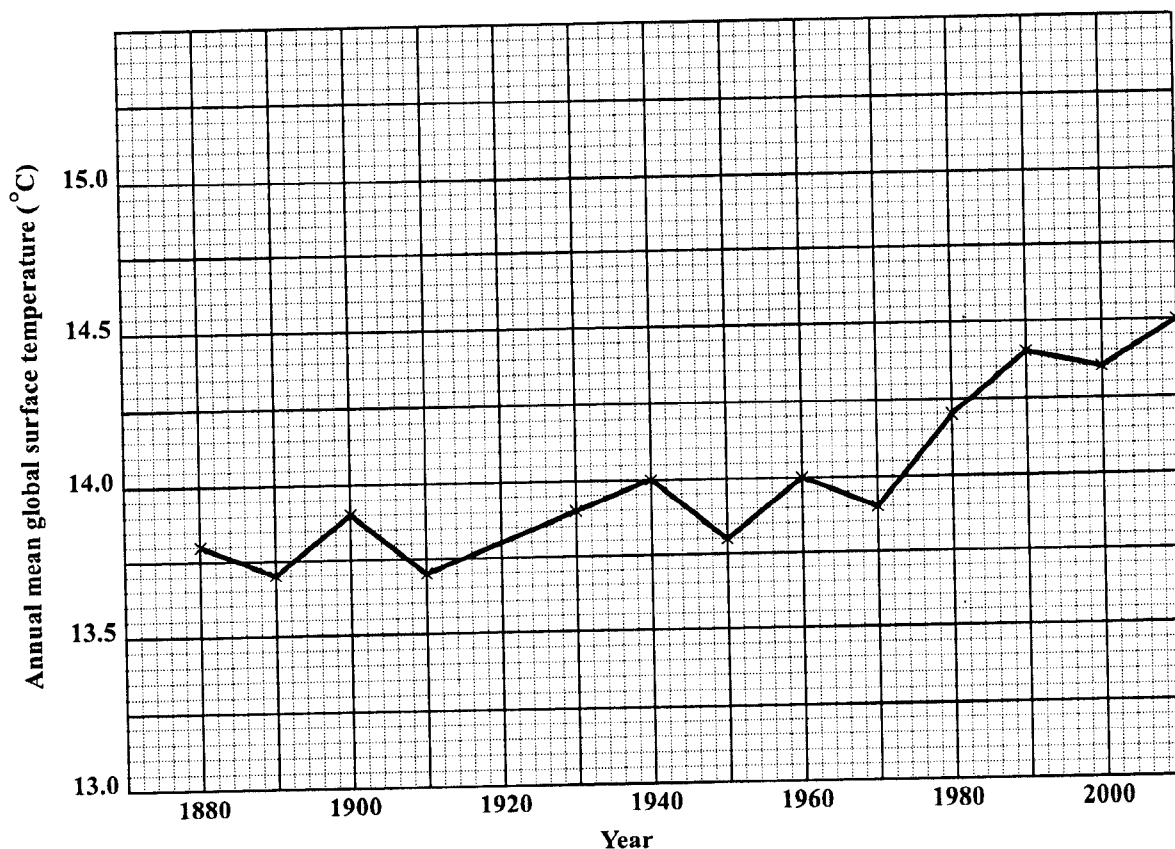

Item 5 refers to the following diagram.

5. On the diagram above, the landforms shown at X and Y, respectively, are a

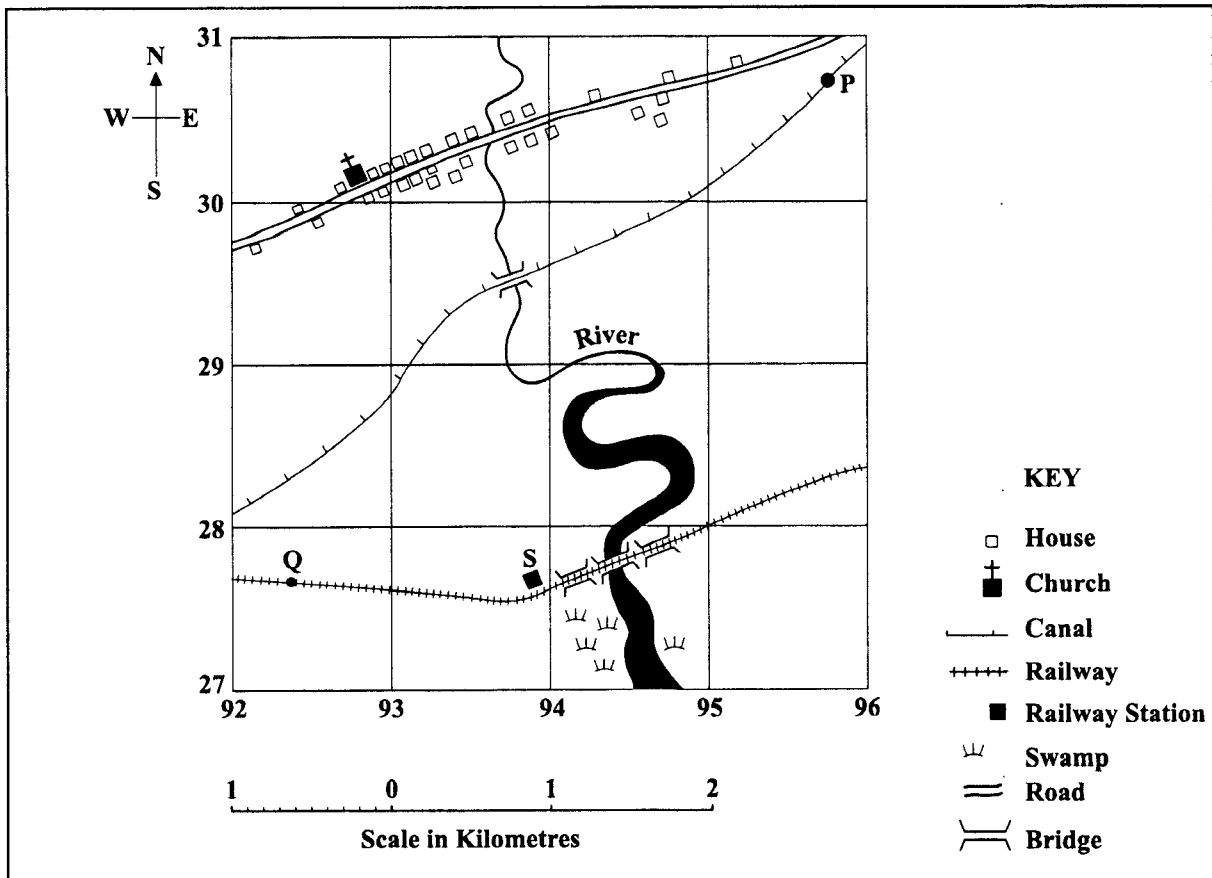

- (A) plateau and ridge
- (B) coastal plain and plateau
- (C) ridge and round-topped hill
- (D) coastal plain and round-topped hill

Items 6–7 refer to the following graph which shows long-term changes in global temperatures over the last two centuries.

6. What degree of change in global temperatures was recorded between 1910 and 1940?
- (A) 0.2
(B) 0.3
(C) 0.4
(D) 0.5
7. The LARGEST change in the annual mean global temperatures occurred over the period
- (A) 1890–1910
(B) 1920–1940
(C) 1970–1990
(D) 1980–2000

Items 8–9 refer to the following sketch map.

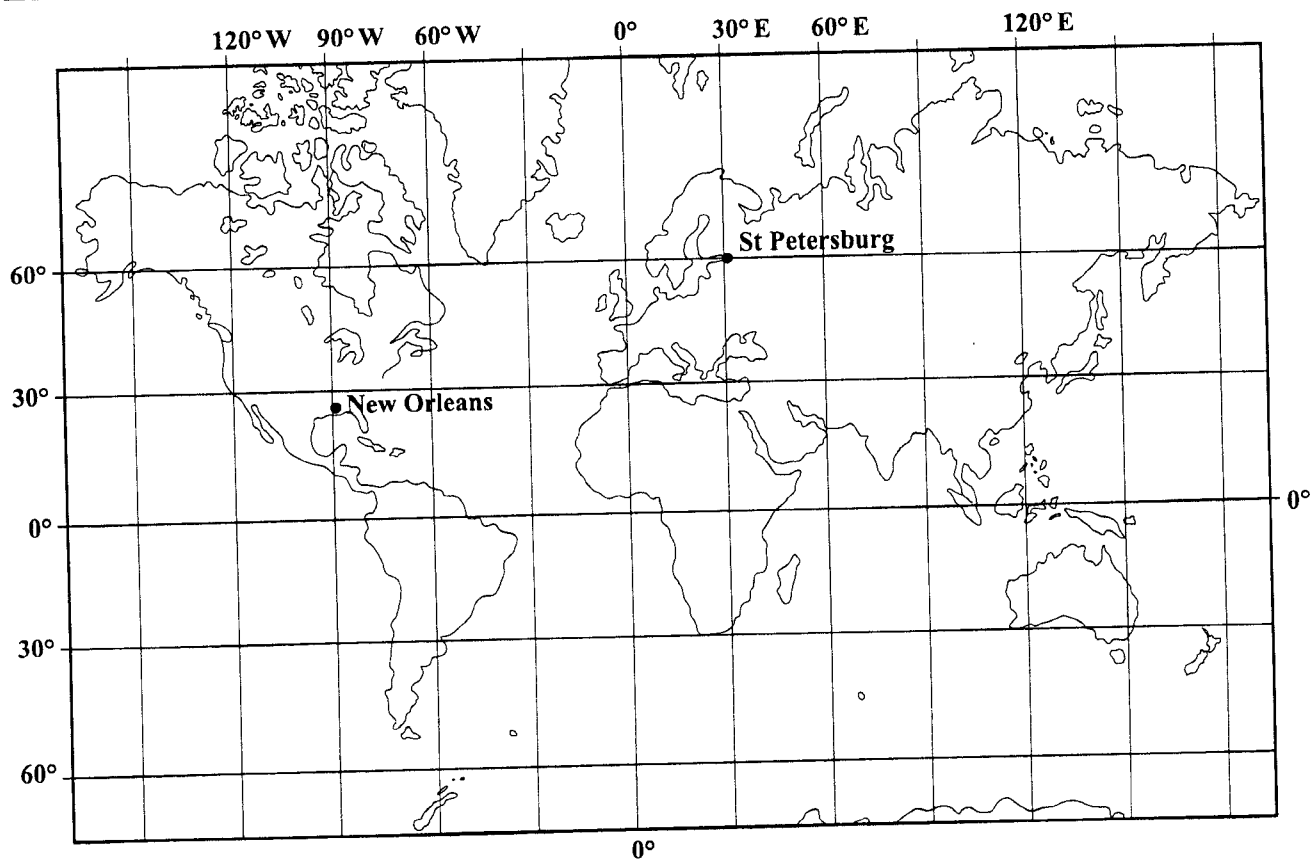

8. The feature labelled S is situated in grid square

- (A) 2728
- (B) 2793
- (C) 9327
- (D) 9394

9. The feature passing through Q is a

- (A) road
- (B) river
- (C) canal
- (D) railway

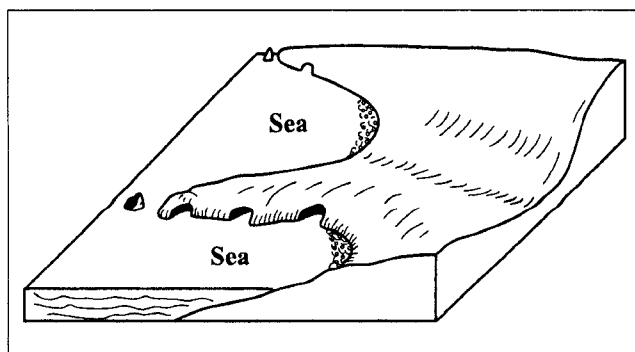

Items 10–12 refer to the following world map.

10. What is the location of St Petersburg?
- (A) 30° N 90° W
 - (B) 30° N 60° W
 - (C) 60° N 30° E
 - (D) 60° N 30° W
11. The direction of the prime meridian from New Orleans is
- (A) east
 - (B) west
 - (C) north
 - (D) south
12. What time is it in New Orleans when it is 10:00 p.m. on Monday in St Petersburg?
- (A) 2:00 p.m. Monday
 - (B) 2:00 a.m. Monday
 - (C) 2:00 p.m. Sunday
 - (D) 2:00 a.m. Sunday

GO ON TO THE NEXT PAGE

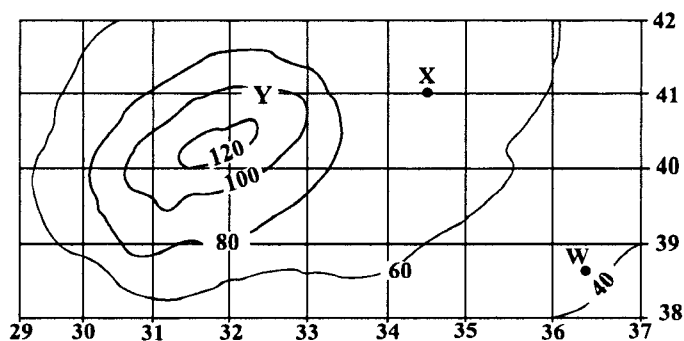

Item 13 refers to the following diagram which shows a coastline.

13. Which of the following features is NOT shown on the diagram?

- (A) Cliff
- (B) Headland
- (C) Bay-head beach
- (D) Wave-cut platform

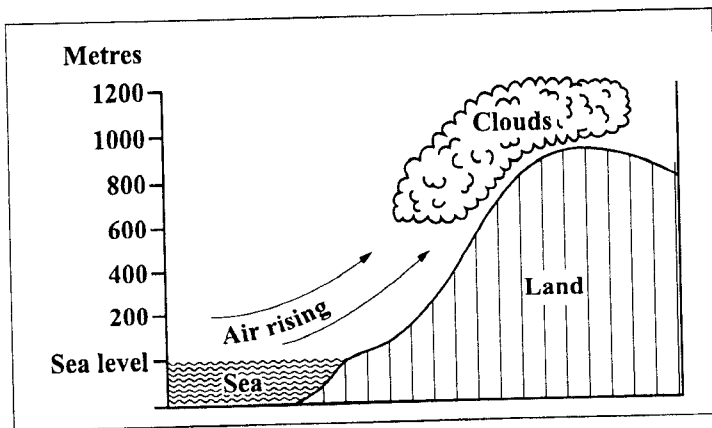

Item 14 refers to the following contour sketch map (contours in metres) showing Points **X** and **W** and Area **Y**.

14. The bearing of **X** from **W** is approximately

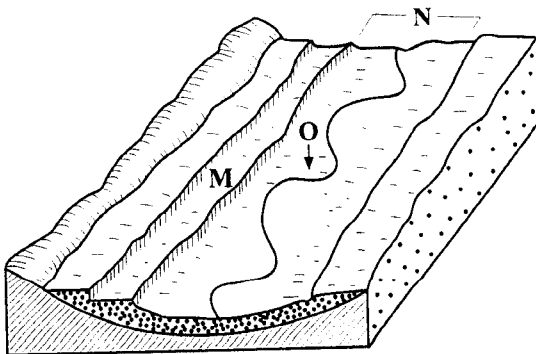

- (A) 045°
- (B) 135°
- (C) 225°
- (D) 315°

Item 15 refers to the following diagram which shows air rising and clouds forming over a highland.

15. At what height, in metres, above sea level does condensation begin?
- (A) 200
 - (B) 400
 - (C) 600
 - (D) 1 200

Items 16–17 refer to the following diagram of a river valley.

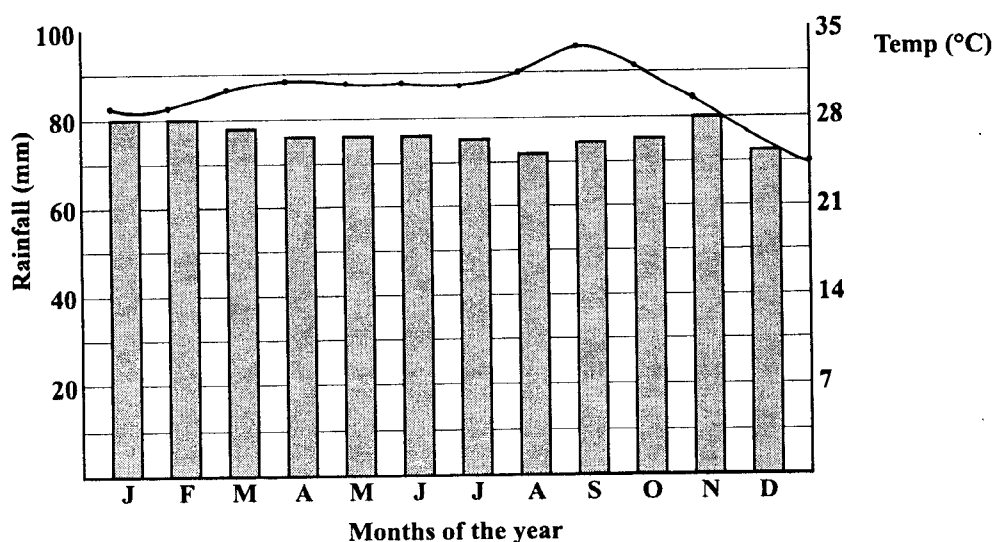

16. The feature labelled **M** is a
- (A) levee
 - (B) terrace
 - (C) waterfall
 - (D) floodplain
17. Which of the following features forms in the area marked **N**?
- (A) A levée
 - (B) A plateau
 - (C) A floodplain
 - (D) An alluvial fan

18. Which of the following conditions is needed for the growth of coral?

- (A) Cloudy (turbid) water
- (B) Very gentle wave action
- (C) Fresh (low salinity) water
- (D) Warm water temperatures

Items 19–20 refer to the following rainfall and temperature graph for Country P.

19. Which month had the highest temperature?

- (A) June
- (B) July
- (C) August
- (D) September

20. Which of the following types of climates is represented by the information in the graph?

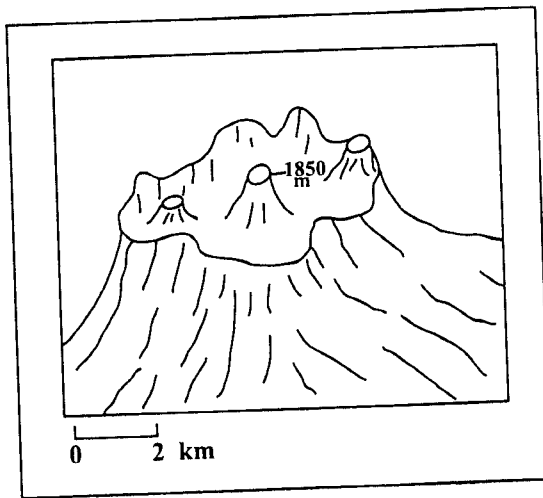

- (A) Hot desert
- (B) Equatorial
- (C) Tropical marine
- (D) Tropical continental

21. A volcanic spine develops when

- (A) the lava is viscous
- (B) a caldera is present
- (C) the explosion is violent
- (D) ash and cinder are ejected

GO ON TO THE NEXT PAGE

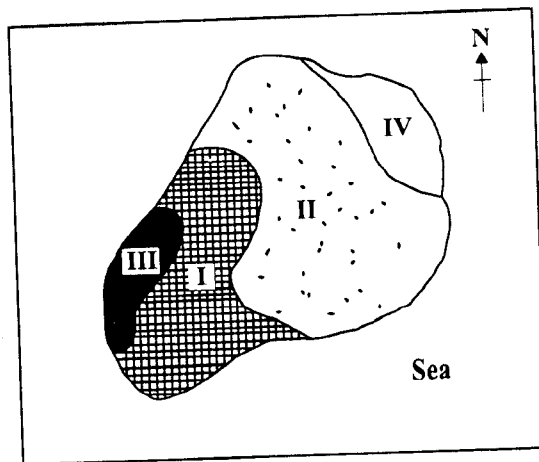

Item 22 refers to the following diagram.

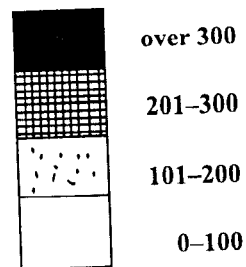

22. The diagram above represents a

- (A) caldera
- (B) lava plateau
- (C) volcanic plug
- (D) volcanic dome

Item 23 refers to the following diagram.

Persons per sq km

23. The diagram above shows population

- (A) change
- (B) density
- (C) movement
- (D) distribution

Items 24–25 refer to the data in the following table which shows world production of aluminium (million tonnes) in selected countries for 2003.

Country	Aluminium Production (million tonnes)	Country	Aluminium Production (million tonnes)
Australia	1.8	Mozambique	0.4
Argentina	0.3	Norway	1.2
Brazil	1.4	Spain	0.4
Canada	2.8	Russia	3.5
China	5.4	UK	0.4
France	0.5	USA	2.7
West Germany	0.8	Venezuela	0.6
Italy	0.2		
World Total			27.7

24. Which country produced **just over one-tenth** of the aluminium in the world in 2003?

(A) USA
(B) Russia
(C) Canada
(D) Argentina

25. The number of tonnes of aluminium produced by Norway was

(A) 1 200
(B) 12 000
(C) 120 000
(D) 1 200 000

26. Which of the following features is formed by vertical erosion in the upper course of a river?

(A) Potholes
(B) River cliff
(C) Flood plain
(D) Interlocking spur

27. The point where a river begins is referred to as

(A) level
(B) mouth
(C) source
(D) gradient

28. The 'process of exfoliation' may be defined as the

(A) peeling off of the outer layers of rocks
(B) splitting of rocks into rectangular blocks
(C) movement of rocks due to the action of rivers
(D) disintegration of rocks by root penetration into crevices

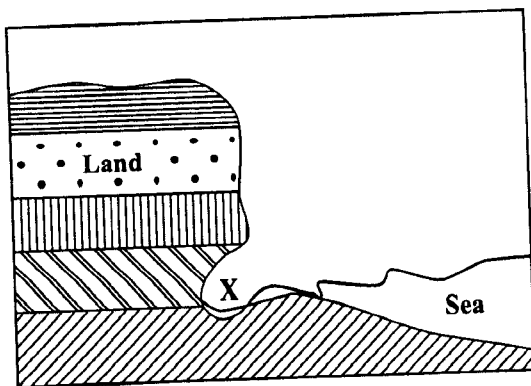

29. A river that is wide, shallow and has bars and islands around which the river flows is described as

(A) flooded
(B) braided
(C) turbulent
(D) meandering

30. Which of the following statements explains how vegetation contributes to the development of soils?

(A) Decaying vegetation produces a habitat for earthworms.
(B) Vegetation decomposes to produce the organic matter in the soil.
(C) Roots, twigs and leaves are washed downwards to increase the depth of soil.
(D) Vegetation provides the parent material which helps in the formation of soil structure.

Item 31 refers to the following diagram which shows a coastline.

31. The feature labelled X in the diagram above is MOST likely the result of the

(A) longshore drift
(B) changes in sea level
(C) weathering of rocks
(D) strength of the waves

32. Which of the following factors is the MOST important contributor to the growth of cities in the Caribbean?

(A) Rural-Urban migration
(B) Urban-Rural migration
(C) International migration
(D) Changes in the urban boundaries

33. Which of the following correctly describes the relationship between weather and climate?

(A) Climate refers to the conditions of the atmosphere whereas weather mainly refers to the seasons.
(B) Weather includes atmospheric conditions such as cloud cover and winds, while climate refers to temperature and rainfall.
(C) Climate is a changeable and everyday occurrence, while weather refers to changes in the atmosphere over a longer time.
(D) Weather is the day-to-day changes in the atmosphere, while climate is the average condition of the atmosphere over many years.

34. Which of the following is the MOST serious problem hindering rapid agricultural development in the Caribbean?

(A) Lack of capital
(B) Rapid soil erosion
(C) The lack of crop variety
(D) A high incidence of crop disease

35. Which of the following factors may increase the rate of soil erosion?

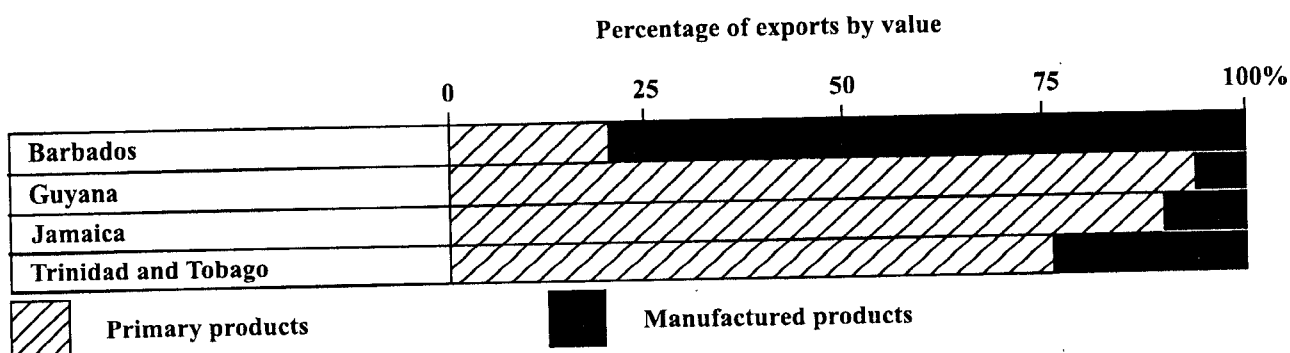

- I. Afforestation
- II. Very intense rainfall
- III. Poor cultivation techniques

- (A) I only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

36. The method of crop cultivation that uses extensive practices and results in high yields per worker is called

- (A) mixed farming
- (B) market gardening
- (C) subsistence farming
- (D) commercial arable farming

Items 37-38 are based on the following graph which shows the relative value for exports of primary and manufactured products from four Caribbean territories in one year.

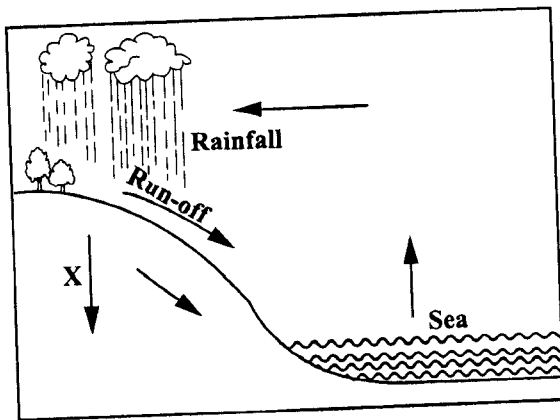

37. For which of the following territories was the value of manufactured products exported GREATER than 75% of the total exports?

- (A) Guyana
- (B) Jamaica
- (C) Barbados
- (D) Trinidad and Tobago

38. In which of the following territories was there the GREATEST difference in value between primary products and manufactured products?

- (A) Jamaica
- (B) Guyana
- (C) Barbados
- (D) Trinidad and Tobago

Item 39 refers to the following diagram.

39. In the diagram, X represents

- (A) percolation
- (B) evaporation
- (C) precipitation
- (D) transpiration

40. Which of the following factors causes temperatures to be high in the Caribbean?

- (A) Rainfall
- (B) Altitude
- (C) Latitude
- (D) Wind direction

41. Which of the following is classified as a tertiary industry?

- (A) Fishing
- (B) Tourism
- (C) Oil refining
- (D) Food processing

42. Which of the following situations have resulted from the setting up of secondary industries in the Caribbean?

- I. Reduced cost of living
- II. Increased external markets
- III. Increased employment opportunities

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Item 43 refers to the following table which shows sugar production (millions of tonnes) in the Caribbean and Latin America, 1961–2001.

Country	1961	1971	1981	1991	2001
Antigua and Barbuda	183 820	134 100	2 801	0	0
Barbados	1 400 117	1 233 500	966 000	587 000	520 000
Cuba	55 885 920	54 700 000	66 678 496	79 700 000	35 000 000
Grenada	10 400	10 535	9 300	6 500	6 750
St Kitts and Nevis	419 595	276 352	337 500	200 000	188 373
Trinidad and Tobago	2 517 954	2 349 221	1 289 521	1 300 900	1 500 000

*Adapted from R.B. Potter et al.,
The Contemporary Caribbean, Routledge 2004, p.116.*

43. Based on the data in the table above, which of the following statements are TRUE about sugar production between 1961 and 2001?

- I. Sugar production in St Kitts declined.
- II. Sugar production in Cuba remained above 30 000 000.
- III. Sugar production in Barbados decreased by over 50%.

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

44. Most capital cities in the Caribbean have coastal locations MAINLY because they

- (A) began as major ports
- (B) were important fishing towns
- (C) began as important tourist resorts
- (D) were sites for international airports

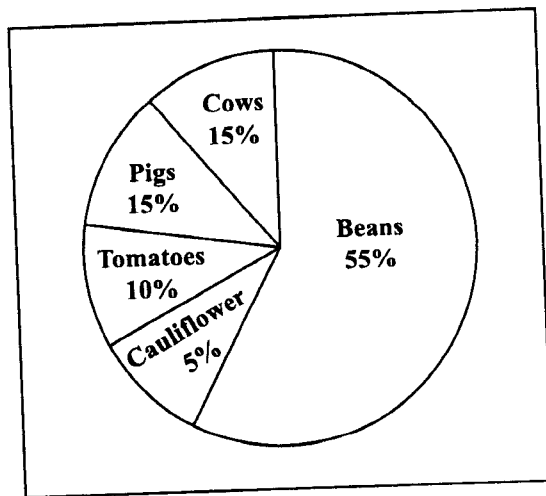

45. Which of the following are problems associated with urbanization in the Caribbean?

- I. Decentralization of shopping facilities
- II. Unemployment and underemployment
- III. Poor public transport

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

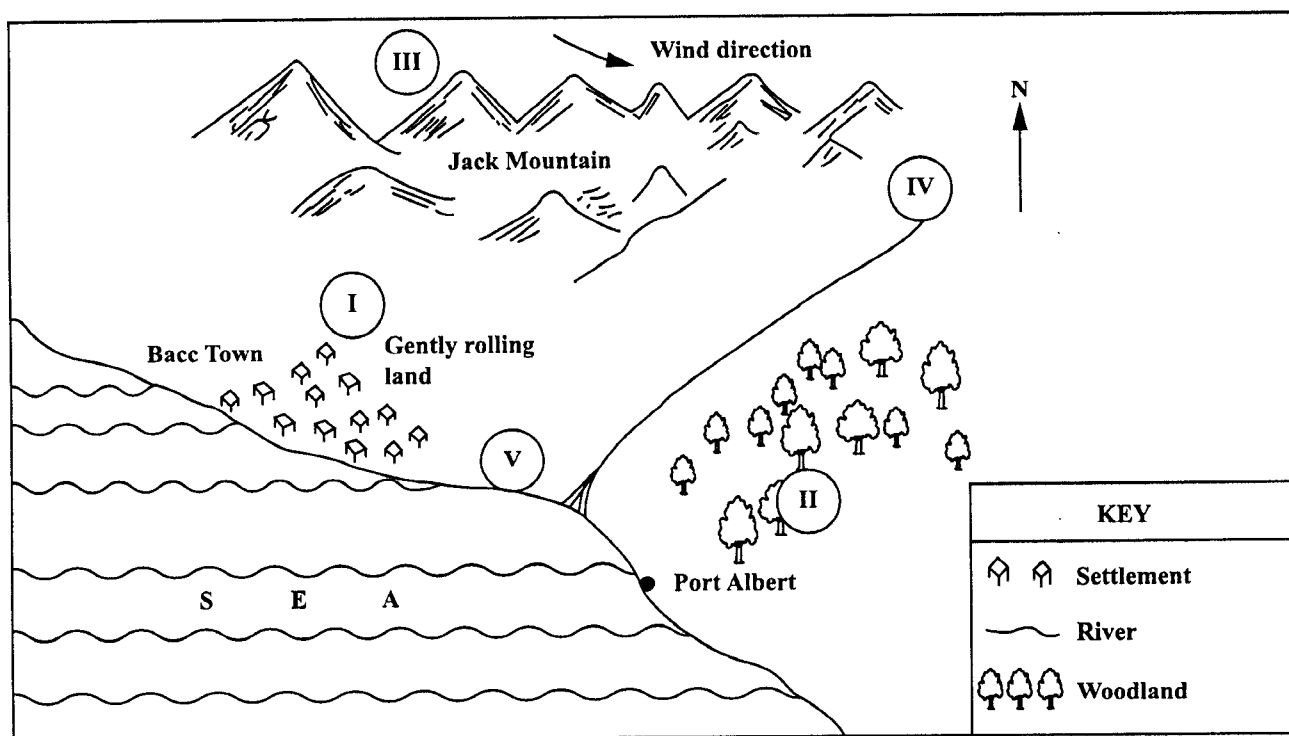

GO ON TO THE NEXT PAGE

46. Which of the following conditions is a problem in urban areas of the Caribbean?
- (A) Shortage of labour
 - (B) Inadequate housing
 - (C) Absence of paved roads
 - (D) Inadequate shopping facilities
47. At a transform plate margin, crustal plates are
- (A) being pulled apart
 - (B) sliding past each other
 - (C) colliding with each other
 - (D) being reabsorbed into the mantle
49. Changes in global trade policies impact Caribbean traditional export crops because they
- (A) stimulate policies
 - (B) encourage competition
 - (C) encourage climate change
 - (D) increase preferential markets
50. The rate of natural increase of a population is determined by
- (A) birth and death rates
 - (B) birth rates and migration
 - (C) death rates and emigration
 - (D) birth rates and immigration
51. When magma emerges on the surface it may lead to the formation of
- (A) sills
 - (B) dykes
 - (C) laccoliths
 - (D) lava flows
52. Which of the following is considered a poor farming practice?
- (A) Crop rotation
 - (B) Overgrazing
 - (C) Strip cropping
 - (D) Contour ploughing
53. Which of the following activities poses the MOST serious threat to water quality in the rivers of the Caribbean?
- (A) Dumping of waste
 - (B) Jet skiing by tourists
 - (C) Flooding from hurricanes
 - (D) Improper fishing practice
- Item 48 refers to the following diagram which shows how a farmer used his plot of land.

48. Which statement BEST describes the farm depicted above?
- (A) It practises monoculture.
 - (B) Cauliflower is the main crop grown.
 - (C) More than half of the farm is used for crops.
 - (D) More than half of the farm is used to rear animals.

Items 54–55 are based on the following sketch map of an area.

54. Which of the areas, I, II, III or IV, would be a typical location for commercial arable farming (plantation agriculture) in the Caribbean?
- (A) I
(B) II
(C) III
(D) IV
55. Which of the following would be the BEST area to locate a new factory in order to minimize the effects of air pollution?
- (A) I
(B) II
(C) III
(D) IV

56. "Algae, nourished by waters enriched with nutrients, grow in abundance over the corals causing them to die."

The situation described above can come about through

- (A) oil pollution
- (B) sewage discharge
- (C) dredging and mining
- (D) fishing and dynamite

57. Which of the following substances is NOT expected to pollute the underground water supply?

- (A) Mulch
- (B) Gasoline
- (C) Pesticide
- (D) Fertilizer

58. Which of the following is a form of air pollution?

- (A) Smog
- (B) Oil spill
- (C) Raw sewage
- (D) Mercury poisoning

59. Which of the following sequences USUALLY occurs where soil erosion is a problem?

- (A) Increased runoff → decreased infiltration → deforestation → soil erosion
- (B) Increased runoff → deforestation → decreased infiltration → soil erosion
- (C) Deforestation → increased infiltration → increased runoff → soil erosion
- (D) Deforestation → decreased infiltration → increased runoff → soil erosion

60. Which combination of factors would MOST likely result in flooding?

- I. Soil conservation methods in use
 - II. Deforestation
 - III. Dumping of garbage in rivers
- (A) I and II only
 - (B) I and III only
 - (C) II and III only
 - (D) I, II and III

END OF TEST

IF YOU FINISH BEFORE TIME IS CALLED, CHECK YOUR WORK ON THIS TEST.
