TEST CODE **01229010**

JANUARY 2017

CARIBBEAN EXAMINATIONS COUNCIL
CARIBBEAN SECONDARY EDUCATION CERTIFICATE®
EXAMINATION

INFORMATION TECHNOLOGY

Paper 01 – General Proficiency

1 hour 30 minutes

17 JANUARY 2017 (p.m.)

READ THE FOLLOWING INSTRUCTIONS CAREFULLY.

1. This test consists of 60 items. You will have 1 hour and 30 minutes to answer them.
2. In addition to this test booklet, you should have an answer sheet.
3. Each item in this test has four suggested answers lettered (A), (B), (C), (D). Read each item you are about to answer and decide which choice is best.
4. On your answer sheet, find the number which corresponds to your item and shade the space having the same letter as the answer you have chosen. Look at the sample item below.

Sample Item

Which of the following pairs represents general purpose software tools?

- (A) Spreadsheet and database software
- (B) Word processor and accounting software
- (C) Student record system and database software
- (D) Insurance processing and spreadsheet software

Sample Answer

The best answer to this item is “spreadsheet and database software”, so (A) has been shaded.

5. If you want to change your answer, erase it completely before you fill in your new choice.
6. When you are told to begin, turn the page and work as quickly and as carefully as you can. If you cannot answer an item, go on to the next one. You may return to that item later.

DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO.

1. Resolution determines the clarity of the image displayed on a monitor. The term 'resolution' refers to the number of pixels
 - (A) that makes up the colour
 - (B) arranged vertically on the screen
 - (C) arranged horizontally on the screen
 - (D) arranged in a unit area of the screen
2. Which of the following operations displays results?
 - (A) Input
 - (B) Output
 - (C) Storage
 - (D) Processing
3. Of the storage devices listed below, which group does NOT use laser technology?
 - (A) CD, DVD, flash drive
 - (B) CD, floppy disk, flash drive
 - (C) Hard disk, floppy disk, magnetic tape
 - (D) Magnetic tape, flash memory card, DVD
4. A set of data that is waiting to be either processed or output, is stored in a temporary block of memory called a
 - (A) track
 - (B) sector
 - (C) buffer
 - (D) cylinder
5. Which of the following processing modes is used for processing utility bills?
 - (A) Real time
 - (B) Multitasking
 - (C) Time sharing
 - (D) Batch processing
6. Which of the following devices is an example of a manual input device?
 - (A) Touchscreen monitor
 - (B) Barcode reader
 - (C) Speaker
 - (D) Plotter
7. Which part of the central processing unit (CPU) coordinates its activities?
 - (A) Register
 - (B) Control unit
 - (C) Main memory
 - (D) Arithmetic logic unit
8. The processing mode that allows one CPU to run many applications at the same time is called
 - (A) time-sharing
 - (B) multiprocessing
 - (C) batch processing
 - (D) real time processing
9. Which of the following types of technology is commonly used by banks to read data on cheques?
 - (A) POS
 - (B) OCR
 - (C) OMR
 - (D) MICR
10. A socket which is provided in a computer to allow for additional components is known as
 - (A) a fire wire
 - (B) a system bus
 - (C) an expansion card
 - (D) an expansion slot

11. Cabled transmission media do NOT include

- (A) coaxial
- (B) fibre optics
- (C) satellite
- (D) twisted pair

12. Which of the following is NOT a physical access restriction?

- (A) Encryption
- (B) Security guard
- (C) Biometric system
- (D) Fire and water-proof cabinet

Item 13 refers to the following diagram.

FILE

Open
Print
Edit
Open with ▶
Send to ▶
Cut
Copy
Rename

13. The diagram above represents a

- (A) button
- (B) window
- (C) pop-up menu
- (D) pull-down menu

14. Which of the following provides the SLOWEST Internet access?

- (A) T1 line
- (B) Network
- (C) Dial-up
- (D) Digital subscriber line (DSL)

15. The illegal copying and selling of programs is referred to as

- (A) propaganda
- (B) software piracy
- (C) computer fraud
- (D) industrial espionage

16. Which of the following is TRUE about an intranet?

- (A) Offers unlimited access
- (B) Allows access to suppliers
- (C) Allows access to employees
- (D) Offers limited access to employees and suppliers

17. An electronic point of sale (EPOS) system may most likely NOT be found in

- (A) an office
- (B) a pharmacy
- (C) a supermarket
- (D) an appliance store

18. A type of utility program used to remove application programs is

- (A) a file compression program
- (B) a troubleshooting program
- (C) an antivirus program
- (D) an uninstall program

19. What is the decimal equivalent for the binary number 101?

- (A) 2
- (B) 4
- (C) 5
- (D) 8

20. Working from home and linking to the office computer system to submit work is described as
- (A) teleconferencing
 - (B) telecommuting
 - (C) telemarketing
 - (D) teleworking
21. Which device is essential for computer-controlled systems to function with precision in an assembly line?
- (A) Microphone
 - (B) Speaker
 - (C) Camera
 - (D) Sensor
22. Which of the following checks is a data verification method?
- (A) Visual
 - (B) Range
 - (C) Length
 - (D) Parity
23. 1011001 is an example of
- (A) raw data
 - (B) sorted data
 - (C) information
 - (D) secondary data
24. Which of the following functions performs calculations in a computer?
- (A) Input
 - (B) Output
 - (C) Storage
 - (D) Processing
25. Records on magnetic tape are stored
- (A) indexed sequentially
 - (B) sequentially
 - (C) randomly
 - (D) directly
26. What is the function of a network of computers?
- (A) Organizes data among computers
 - (B) Receives data from one computer
 - (C) Allows users to obtain data from a central computer
 - (D) Enables two or more computers to communicate
- Item 27 refers to the following types of memory.
- I. ROM
 - II. RAM
 - III. EPROM
27. Which of the above types of memory are non-volatile?
- (A) I and II only
 - (B) I and III only
 - (C) II and III only
 - (D) I, II and III
28. Which access method is used to retrieve data from a flash drive?
- (A) Direct
 - (B) Serial
 - (C) Sequential
 - (D) Indexed sequential

29. Which type of interface allows the user to communicate with the computer system by keying in instructions?
- (A) Menu driven
 - (B) Graphical user
 - (C) Command driven
 - (D) Touch sensitive
30. Which of the following is/are advantage(s) of information processing?
- I. Retraining of staff
 - II. Reducing human intervention
 - III. Increasing the amount of equipment needed
- (A) I only
 - (B) II only
 - (C) I and II only
 - (D) II and III only
- Item 31 refers to the following algorithm.
- ```
y ← 5
x ← y
y ← 10
z ← 3
x ← x + y
y ← x - z
z ← x + y + z
display x, y, z
```
31. What will be displayed when the algorithm is executed?
- (A) 5, 10, 3
  - (B) 15, 12, 3
  - (C) 15, 12, 20
  - (D) 15, 12, 30
32. The MOST appropriate data type for storing the amount of interest earned on a sum of money is
- (A) real
  - (B) char
  - (C) string
  - (D) integer
33. Which Pascal format is used to declare an array?
- (A) Let Marks = [8]
  - (B) Array = Marks(8);
  - (C) Var Marks: Array [1..8] of integer;
  - (D) Dim Marks (8) as integer
34. In Pascal language, which of the following is an acceptable variable name?
- (A) real
  - (B) #sum
  - (C) 9\_num
  - (D) dateofbirth
35. What does the symbol  represent in information technology?
- (A) Start/Stop
  - (B) Decision
  - (C) Input
  - (D) Process
36. Which of the following is NOT a characteristic of a pseudocode?
- (A) It is precise.
  - (B) It is unambiguous.
  - (C) It has a finite number of steps.
  - (D) It is a graphical representation of the solution.

37. The purpose of inserting comments with program code is to
- (A) allow the user to input data
  - (B) provide an explanation of the program
  - (C) ensure that the program compiles completely
  - (D) provide information on special features of the program

Items 38–39 refer to the following fragment of Pascal code.

```
For x := 2 TO 15 DO
Begin
 Write("Enter the name of a country: ");
 Read (Country)
End;
```

38. How many times will the program above be executed?
- (A) 2
  - (B) 14
  - (C) 15
  - (D) 16
39. Which fragment of code would be the CORRECT option to output the prompt and enter the name of the country on two lines?
- (A) Read ("Enter the name of a country: ");  
Write Country
  - (B) Write ("Enter the name of a country: ");  
Read Country
  - (C) Readln ("Enter the name of a country: ")  
Readln(Country);
  - (D) Writeln ("Enter the name of a country: ");  
Readln(Country);

Item 40 refers to the following algorithm.

Write ("Enter price: ") (1)  
Read (price) (2)  
Vat = price \* 15% (3)  
Write vat (4)

40. Which line contains a processing statement?

- (A) 1
- (B) 2
- (C) 3
- (D) 4

41. A trace table is used for

- (A) testing an algorithm
- (B) declaring an array
- (C) coding an algorithm
- (D) representing an algorithm

42. The FIRST step in solving a problem is to

- (A) test the solution
- (B) define the problem
- (C) evaluate the solution to the problem
- (D) develop the algorithm for the problem

Item 43 refers to the following information about programming.

- I. Compiling to create the object code
- II. Creating the source code
- III. Executing to test for accuracy

43. What is the correct sequence for the above steps in the development of a program?

- (A) I, II and III
- (B) I, III and II
- (C) II, I and III
- (D) III, II and I

44. Machine language is categorized as a

- (A) first generation language
- (B) second generation language
- (C) third generation language
- (D) fourth generation language

45. Program testing can be described as

- I. checking that all documentation is included in the program
- II. executing the program manually with input values to see the results
- III. running the program using sample data to identify errors in the program

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

46. Extracting information from a database can be achieved through the use of

- (A) files
- (B) objects
- (C) queries
- (D) reports

47. A single row of data in a database is called a

- (A) record
- (B) table
- (C) field
- (D) file

48. \$A\$3 is an example of what type of addressing mechanism?

- (A) Red addressing
- (B) Relative addressing
- (C) Formula addressing
- (D) Absolute addressing

Item 49 refers to the following spreadsheet.

|   | A | B  | C | D | E | F | G |
|---|---|----|---|---|---|---|---|
| 1 |   |    |   |   |   |   |   |
| 2 |   | 17 |   |   |   |   |   |
| 3 |   | 35 |   |   |   |   |   |
| 4 |   | 45 |   |   |   |   |   |
| 5 |   | 39 |   |   |   |   |   |
| 6 |   |    |   |   |   |   |   |
| 7 |   |    |   |   |   |   |   |

49. To add the values 17, 35, 45 and 39 in the spreadsheet table above, which function should be placed in cell B6?

- (A) =SUM(B2:B5)
- (B) =SUM(B2:B6)
- (C) =ADD(B2:B5)
- (D) =COUNT(B2:B6)

50. Which of the following actions is required for creating a chart in a spreadsheet?

- (A) Print the data
- (B) Select the paper size
- (C) Select the data
- (D) Select the orientation

51. The default alignment for numbers in spreadsheet is

- (A) left
- (B) right
- (C) centre
- (D) justified

---

Item 52 refers to the following spreadsheet.

| A | B                 | C              | D             | E                   |
|---|-------------------|----------------|---------------|---------------------|
| 1 |                   |                |               |                     |
| 2 | <b>First Name</b> | <b>Surname</b> | <b>Mark 1</b> | <b>Bonus Points</b> |
| 3 | Kingsley          | Clarke         | 69            | No                  |
| 4 | John              | Henry          | 69            | Yes                 |
| 5 | Zara              | Smith          | 71            | Yes                 |
| 6 | Sean              | Smith          | 91            | No                  |

52. The spreadsheet has been sorted by a primary field and then a secondary field. What are the primary and secondary fields respectively?

- (A) Surname, Mark 1
- (B) First Name, Surname
- (C) Mark 1, Bonus Points
- (D) Bonus Points, First Name

Item 53 refers to the following spreadsheet.

|   | A      | B          | C   | D     |
|---|--------|------------|-----|-------|
| 1 |        |            |     |       |
| 2 | VAT    | 15%        |     |       |
| 3 |        |            |     |       |
| 4 | Items  | Cost Price | VAT | Total |
| 5 | Washer | 4300       |     |       |
| 6 | Dryer  | 1500       |     |       |
| 7 | Stove  | 2750       |     |       |

53. What formula should be inserted into C5 to calculate the VAT for the washer?

- (A) = (5B\*2B)
- (B) = (B5\*\$B\$2)
- (C) = (5B\*\$B\$2)
- (D) = (B5\*B2/100)

54. Which of the following features allows the user to insert individual names in a primary document?

- (A) Footer
- (B) Header
- (C) Mail merge
- (D) Search and replace

56. In order to perform a block operation in a word processing application, the required text must first be

- (A) cut
- (B) copied
- (C) aligned
- (D) selected

55. A website consists of a set of web pages that are linked together with

- (A) hyperlinks
- (B) Bluetooth
- (C) HTTP
- (D) HTML

57. I need to search a 50-page document for the acronym IT and insert the words 'Information Technology' in its place. Which of the following is the MOST efficient method for accomplishing this task?

- (A) Find and replace option
- (B) Insert key found on the keyboard
- (C) Scan the document and quickly make the necessary changes
- (D) Cut each occurrence of IT and then type in Information Technology

58. Which of the following must be considered when creating a website?

- I. The intended audience
- II. The artistic design of the whole website
- III. The layout of the pages in the website

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

59. Which of the following is normally used for website-to-website connections?

- (A) Modem
- (B) Monitor
- (C) Hypertext
- (D) Hyperlink

60. Which of the following PowerPoint Presentation icons represents the slide sorter?

(A) 

(B) 

(C) 

(D) 

**END OF TEST**

**IF YOU FINISH BEFORE TIME IS CALLED, CHECK YOUR WORK ON THIS TEST.**
