Unit 1 Paper 2

Question 3

The candidate used the correct worksheet to draw up the Cash Book with the labels of 'Date', 'Details', 'Folio', 'Discount', 'Cash' and 'Bank' on both the debit and credit sides.

He/she wrote the correct date with correct entries and identified the contra entry. The candidate entered the correct credit entry for restoring the impress and calculated the discounts correctly and balanced the account with correct details.

The candidate correctly opened and reimbursed the account under the Amount column and not the Total column. He/she classified the expenses as either Office Supplies or Cleaning Expenses and writ in the actual figures (amounts) and balanced the account correctly.

The candidate used the appropriate worksheet and indicated the name of the ledger account at the top, named the accounts in the General Ledger and showed the posting of their totals on the debit side.

This is an example of an excellent response. It is exemplary of a Grade I.

Marta's Trading, Profit and loss A/c for the year ended Dec 31, 2010

Unit 1 Paper 2

Question 5

The candidate recognized that the question did not begin at the top of the format. He/she realized that it began at "cost of raw material used". From the onset, it appeared that the candidate took into consideration the type of manufacturing concerns for which they were required to prepare accounts.

With the above knowledge the candidate was able to correctly categorize the various items under the appropriate headings. Thus identifying and labeling the required areas of the account, that is Prime Cost, Factory Overhead and Production Cost.

The candidate understood how to apply the provision for depreciation amount in order to calculate the depreciation for the year on the kitchen equipment.

He/she also realized that boxes were used for the packaging of the baked items and a consequence included the figure for boxes in the factory overhead cost. As a result, his/her understanding of the type of business and the ability to follow the instructions were clearly delineated in the questions. This candidate arrived at the correct figure for Production Cost, a mark which a very large percentage of candidates failed to score.

Part C of the question was very well done.

This candidate was able to calculate the correct Prime Cost figure.

He/she did not correctly interpret the instruction for the calculation of depreciation for the small kitchen appliances used. The candidate was told in the question that the small kitchen appliance was valued at \$500 and recognized that the \$400 was depreciation but also in error included the cost of the asset \$900 in the Income Statement. As a repercussion the candidate lost the mark for the correct figure for Cost of Production.

This is an example of a very good response. It is exemplary of a Grade I.

Do not
write

Write on both sides of the paper and start each answer on a new page.

Goodlands Housewives Cooperative

Appropriation Account for year ended April 30, 2011

Surplus		108900
add: Undistributed profit		48600
		157500
less: Appropriations		
Transfer to Education Fund	31500	
Transfer to Health Benefit Plan Reserve	23625	
Patronage Refund	45000	
Dividends proposed	2500 1250	
		102625
		101375
(Undistributed profit 'd		54875 56125

c.

$$\begin{aligned} \text{i. amount due} &= 25\% \text{ of } \$3845 \\ &= \$961.25 \end{aligned}$$

$$\begin{aligned} \text{ii. proposed dividends} &= 10\% \text{ of } (42 \times \$10) \\ &= 10\% \text{ of } \$420 \\ &= \$42.00 \end{aligned}$$

$$\begin{aligned} \text{total amount} &= \$961.25 + \$42.00 \\ &= \$1003.25. \end{aligned}$$

d. One benefit is that housewives are able to obtain low interest loans.

DATE	PARTICULARS	FO	DEBIT		CREDIT	
2009 may	Cash	CB	300	00		
	Registration Fees	GL			300	00
	Fifty housewives pay \$6.00 each for registration fee					
may 1	Cash	CB	12500	00		
	Share Purchase	GL			12500	00
	Each member buys 25 shares @ \$10.00 each					
			12800	00	12800	00

Principles of Accounts

Exemplars

Unit 1 Paper 2

Question 6

This candidate used the correct stationery. The correct date, May 2009 was clearly entered in the date column. Cash account was debited with the correct figures in both journal entries, that is, \$300 and \$12,500. The correct accounts were credited in each instance, that is, Registration Fee and Share Capital. The correct figure for share capital was \$12,500 $50(25 \times 10)$ was calculated. An appropriate narration for each journal entry was also included.

This candidate included the proper heading (a) Name of the organization, (b) Name of the account (c) The period of time under review (for year ended). The candidate started the appropriation account with the surplus attained during the year and added this to the undistributed profit from the previous period, to show the amount available for distribution. Four appropriations from the available surplus were clearly identified (i) Education fund 20% (ii) benefit reserve 15% (iii) Patronage Refund 25% of sales and (iv) proposed dividend for the same member was correctly calculated, that is, 10% of $(42 \times \$10) = \42.00 .

This candidate correctly indicated that one of the benefits of joining a cooperative is receiving loans at a low interest rate.

This is an example of an excellent response. It is exemplary of a Grade I.
